Description:

The Fluorescent Yellow Coverall with Reflective Strip is a high-performance protective garment designed for workers exposed to cold and low-visibility environments. Made from durable 300D Oxford polyester with PU coating, it offers resistance against wind, light rain, and harsh outdoor conditions. The coverall features 5 cm high reflective tape for enhanced visibility and a 160g quilted lining for thermal insulation, ensuring comfort and protection during extended use in cold environments.

Features:

- ★ High visibility fluorescent color for maximum safety
- ★ Durable PU-coated fabric for weather resistance
- ★ 160g quilted lining provides excellent warmth
- ★ 5 cm reflective tape enhances visibility in low-light conditions
- ★ Full-body protection against cold and wind
- ★ Secure front closure with zipper and buttons
- ★ Comfortable fit for long working hours

Applications:

- ★ Construction and road work
- ★ Cold storage and refrigeration environments
- ★ Outdoor maintenance and utility work
- ★ Warehousing and logistics
- ★ Night shift operations
- ★ Industrial workplaces in cold climates
