

Technical Specifications:

Product Type:	Rubber Traffic Cone
Material:	High-quality rubber
Color:	Orange with reflective sleeve
Reflective Material:	High visibility reflective tape
Weather Resistance:	Suitable for indoor and outdoor use
Stability:	Heavy base for improved balance

Description:

The HEX Rubber Cone is a durable traffic safety cone designed for effective traffic control and hazard marking. Manufactured from high-quality rubber, it offers excellent stability, flexibility, and resistance to harsh weather conditions. The hexagonal base design provides enhanced stability and prevents the cone from tipping over easily, even in windy environments. The cone is typically equipped with reflective sleeves to improve visibility during nighttime or low-light conditions, ensuring maximum safety in traffic and construction zones.

Features:

- ★ Durable and flexible rubber construction
- ★ Hexagonal base for enhanced stability
- ★ High visibility color for improved safety
- ★ Reflective tape for night-time visibility
- ★ Resistant to weather, UV, and impact
- ★ Easy to place, stack, and transport
- ★ Long service life in demanding environments

Applications:

- ★ Road construction zones
- ★ Traffic control and diversion
- ★ Parking areas
- ★ Airports and logistics yards
- ★ Industrial sites and warehouses
- ★ Event management and crowd control
