

Technical Specifications:

Material:	Multilayer barrier laminate (PE/EVOH laminate film)
Length:	Approx. 35 cm
Thickness:	Approx. 0.18 mm
Finish:	Smooth surface
Type:	Ambidextrous
Grip:	Smooth
Cuff Style:	Straight cuff
Disposable:	Yes

Description:

North Safety 4H Chemical Gloves are high-performance protective gloves designed to provide exceptional resistance against a wide range of hazardous chemicals. Manufactured using a multilayer barrier laminate, these gloves offer superior protection against aggressive chemicals, solvents, and toxic substances. They are widely used in laboratories, chemical handling, hazardous material response, and industrial environments where reliable chemical protection is required.

Features:

- ★ Excellent resistance to a wide range of hazardous chemicals
- ★ Multilayer barrier laminate for superior chemical protection
- ★ Lightweight and flexible for improved comfort
- ★ Ambidextrous design for easy use
- ★ Smooth surface for easy handling
- ★ Suitable for use as an inner glove with outer protective gloves
- ★ Reliable protection in highly hazardous environments

Applications:

- ★ Chemical handling and processing
- ★ Hazardous material response
- ★ Laboratories and research facilities
- ★ Petrochemical industry
- ★ Pharmaceutical manufacturing
- ★ Paint and solvent handling
- ★ Industrial maintenance
