

POT MAGNET WITH CUP HOOK

PRODUCT DATA SHEET

Technical Specifications:

Material: Neodymium magnet encased in a steel cup

Pull Force: Varies depending on the size.

Magnetic Surface: Smooth and flat for optimal holding power

Temperature Range: Operable up to 80°C

Hook Type: Removable hook

Description:

Pot magnets with cup hooks are designed for secure holding and suspension in various applications, providing a reliable way to hang or mount objects.

Features:

- ★ **High Strength:** Strong neodymium magnet with superior holding power
- ★ **Corrosion Resistance:** Coated with nickel or zinc to withstand moisture and rust
- ★ **Versatile Hook:** Ideal for hanging tools, signage, decorations, or wires
- ★ **Compact Design:** Small footprint allows for use in tight spaces

Applications:

- ★ Industrial use for tool organization and suspension
- ★ Home and office organization (e.g., hanging keys or decorations)
- ★ Display setups for trade shows or exhibitions
- ★ Use in workshops or garages for holding equipment

Installation Tips:

- ★ Ensure the surface is clean and dry for maximum magnetic grip
- ★ Avoid contact with high moisture areas unless using rust-resistant coatings
