

### Technical Specifications:

Material	ABS (Acrylonitrile Butadiene Styrene)
Length	2M (Retractable)
Color Options	Black/Yellow, Red/White
Installation	Easily attaches to safety cones

### Description:

The Cone Bar is a retractable safety barrier that can be easily attached to standard safety cones, creating a solid and visible pedestrian barrier. It is lightweight, durable, and ideal for various temporary crowd control applications.

### Features:

- ★ **Retractable Design** – Adjustable length for flexible use in different environments.
- ★ **Durable ABS Construction** – Lightweight yet strong material for long-term use.
- ★ **High Visibility** – Bright color combinations improve visibility in all conditions.
- ★ **Quick Installation** – Easily attaches to standard traffic cones.
- ★ **Portable & Reusable** – Ideal for temporary traffic and pedestrian control.

### Applications:

- ★ **Parking Areas** – Controls vehicle movement and pedestrian access.
- ★ **Pedestrian Walkways** – Creates safe walking zones in high-traffic areas.
- ★ **Construction Sites** – Enhances site safety by marking restricted zones.
- ★ **Crowd Control** – Helps manage crowds at public events, sports venues, and ski resorts.
- ★ **Citywide Events** – Ideal for temporary traffic redirection and pedestrian safety.
